Re: Chronic Flooding on Wollaston Lake

We, Property Owners and Tax Payers, on Kendon Lane, Wollaston Lake, are writing to express our concerns and frustration with the frequency of flooding of the lake, which has been regularly occurring, it seems now annually! It is even extending beyond the spring thaw period with the most recent June 4th. (2018)

We are questioning the diligence of the monitoring of the flood control by the CVCA in managing the logs to control the flow of water to reduce the levels to be maintained in the lake. It seems that it takes numerous telephone calls and complaints to the CVCA office in order to get the necessary action to be taken to relieve the flooding on a regular basis. This should not be the case if proper due diligence was applied, as implied, on their website.

We find this lack of proper management to be unacceptable. It causes unnecessary property damage, infringes upon natural activity, and is a major nuisance!

We are including Wollaston Township in this communication, as our representative, to request your support in addressing this unsatisfactory matter with Crowe Valley Conservation Authority. We are looking for full value for our tax dollars, which would include proper management of water levels in the lake by the mandated authority.

We need your help to avoid this unnecessary problem.

Bob & Cathy McMahon
